MATERIAL TRANSFER BASKET

*At many plants the process of moving material for maintenance
to the burn floor is an after thought*

MATERIAL TRANSFER BASKET

BENEFITS

Made out of high grade 6061 T6 Aircraft aluminum. Designed for safety and versatility.

10,000 lb capacity. Load and unload up to 2 full pallets of bricks.

Safer than free lifting pallets with a crane. Keeps contents stable, secure, and contained.

Lift and carry with crane or forklift. Heavy duty screening allows transfer of open pallets and loose items safely. Use to carry tools, machines, rubble, etc.
