## Introducing the Brokk Ex Series

Behold the newest members of the Brokk family: The Brokk Ex Series. This new product lineup consists of six models designed specifically for use in potentially explosive environments. With specialized modifications and equipment, such as explosion-proof electrical cabinets, gas detectors and more, these machines provide a new level of safety and durability in work areas with explosive gas hazards.

All Ex machines comply with the ATEX 1994/9/EC directive, classified up to Equipment Class 3G IIA T3. They can be used in what the ATEX directive calls "Zone 2", where explosive gas, vapor or mist may occur. This new capability is especially important for customers working in mining, petroleum and other potentially dangerous industries. The Ex Series brings an even higher margin of Brokk safety to all these environments.

- **Explosion proof according to ATEX directive**
- **Ideal for potentially explosive environments**
- **Same outstanding capabilities as standard Brokk machines**

## Build Your Own Brokk. For Your Own Specific Needs.

**AT A FIRST GLANCE**, the Brokk family seems to consist of 8 members; from the small but surprisingly powerful Brokk 60<sup>II</sup> to the monster of power, Brokk 800. But since you are able to customize your machine with different types of options – long arms, dozer blades etc – you can literally create your own Brokk model.

Here you can see some available options making your Brokk machine even more effective and versatile, year after year. Different options are applicable on different machines, please see specific data sheet for each machine model.
